

Thermo-Couple Products

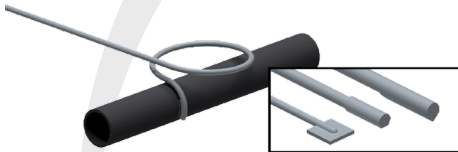

Petrochemical & Refinery

Since 1955, we have manufactured high quality temperature sensors providing accuracy to the highest degree. Our products such as Tube-Temps, also known as tube skins in the industry, thermowell assemblies, multi-points, and transmitters are used in many petrochemical and refinery applications. We pride ourselves on strong working relationships and go above and beyond to provide customized solutions for your project.

Below are products to help you get started.

Tube Skin Thermocouples

Tube-Temps, also known as tube skins, are used in a variety of designs for measuring the temperature of process pipes.

Knife Edge ▪ Pad Type ▪ Fan Type

Thermowell Assemblies

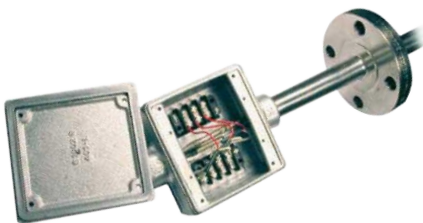

Standard thermowell assemblies are readily available. Custom products can also be manufactured with various materials and overlays to fit your project need.

FM Rated ▪ Special Materials ▪ Weld Overlay

Multi-Points

Multi-point thermocouples allow for long runs and varied data collection points to suit your project's economic need.

Single Thermowell ▪ Multi-Guide Tube
▪ Flexible Thermocouple

Transmitters

Transmitters allow you to access your data anywhere. A variety of 4-20 mA transmitters are stocked.

HART® ▪ Head Mount ▪ DIN Mount
